OBJECTIVE

BG Equity Quantitative Trading aims to profit from long exposures to equity or equity-linked securities of companies domiciled or exercising the predominant part of their economic activity in Europe. The genesis of Boussard & Gavaudan Equity Quantitative Trading ("BG EQT") is as a quantitative strategy which aims to generate outperformance over benchmark indices and particularly in a down trending market. BG EQT was developed as an internal risk sleeve to complement our core fundamental investment portfolio. The investment process in BG EQT - portfolio construction, selection and weighting of assets - is based on quantitative models developed by BG Asset Management.

KEY FEATURES

- A 4-step investment process is based on long-term and short-term momentum strategies, a trend following strategy, and a strategy to handle asset allocation
- Currency-hedged in Euro
- Universe of 800 European stocks based on liquidity with a control for industry and country bias
- Invested in about 50 stocks
- Market cap from EUR 500m to multi-bn
